OUR PRODUCTS

Brass CNC Mahined Components

We are producing machining parts, CNC Precision Machining, covering axles, tubes, flanges and others. We are also producing different kind of machining and casting assemblies and devices for different applications by casting, forging, and machining. Material could be steel, stainless steel, aluminum, copper, nodular casting iron and PA6. Zinc plating, Power coating and other surface treatment is up to customers' requirements.

Capabilities

- Tolerances of up to ± 0.0001
- Bar capacity: from 2 3/8 inches diameter down to 3/16 diameter.
- Run size: specializing in low to medium volume runs from 500 to 20,000 pieces, but we have the capability for even larger runs.
- Parts can be produced with features such as threads, milled flats, knurls, cross holes, and trepans.
- Finishes provided include: Cleaning, Polishing, Buffing, Coloring, and others

Turned Parts Details :

Machine Parts, also referred to as Machine Bolts & Screws, are often used with nuts or driven into tapped holes. They come in a variety of head types and drive styles, but are generally available in smaller sizes.

Brass is rust proof, corrosion resistant and polishes to a rich, golden color. Brass is easily soldered and brazed and accepts plating readily. The typical composition is 70% Copper and 30% Zinc. Strength increases with a higher percentage of Zinc.

Round head fasteners have a dome-shaped head. An older style of head, it is typically used when replacing existing round-head fasteners where an exact match is desired. Common applications for slotted screws include woodworking, although the drive style is not designed to be used with power drivers.

A threaded fastener's size name includes information about the major external diameter, followed by the threads per inch, which indicates if it is coarse or fine. Fine threads are preferable when working with harder materials or when threading into a thin material. They are also stronger in tension than coarse threads, and generally provide higher shear strengths.

Our Brass Precision Machining is good in quality and competitive in price. We are manufacturer and supplier of Brass Precision Machining. We export Brass Precision Machining. We supply OEM service of Brass Precision Machining for you.
