Product Description:

Packing:

• **Ground earthing Grounding rods Earth rods grounding Rods** are packed individually in PVC tube bags and rods are fitted with black caps at both the ends, thus preventing threads getting damaged while handling.

Copper earth rod grounding rod Fittings:

- **Diving Head:** Reusable high tensile steel for Copper plated Copper bonded earthing rods grounding rods.
- **Coupling:** Brass or Aluminium Bronze.
- **Driving Spike:** High strength alloy steel.
- **Internal Coupling:** Phosphorus Bronze or high tensile brass dowel.

Copper Bonded Earth Grounding Rods Copper plated Earth rods Copper plated Ground rods Grounding rods are made from high tensile-low carbon steel compelling with requirements of BS 4360 Grade 43 A. Each grounding rod is molecularly bonded by 99.99% pure, high conductivity copper bonding's, each rod is treated with Benzol-triozole derivatives. Threads on rods are formed by roll threading process, giving threads extra strength, eliminating risk of chipping the threads while driving the rods in the ground.

Solid Copper Earth Rods are made in two types. Externally threaded and internally threaded. Solid Copper earth rods are used where the factor of corrosion is very high and exceptionally long life is equable. Hence these rods are manufacture from pure and high conductivity hard drawn copper to BS 2874-C 101. These rods are also available with tin plating in order to blueuce the risk of oxidation and increasing shelf life.

Amu manufactures a vast range of Earth ground earthing grounding Rod clamps in Naval Brass, Gunmetal and Aluminium. Special clamp as per customer specifications can also be supplied for **grounding rods**.

Rod to tape clamp

(A Clamp) Accommodates wide range of Copper / AI tape.

Rod to Conductor Clamp

(G clamp) Available in light and heavy duty. Accommodates conductor size from 10 mm² to 120mm² .

**Rod to cable Lug clamp**

(Type B) Available with M12 Bolt complete with Brass washer and nuts.
